

welcome.

Moventi started by studying people in the workplace – how they work, where they work, how they collaborate and how new working practices are developing. This study formed the foundation of a range of furniture that is not only inspiring but provides practical solutions for everyday activities in the workplace.

With a craving for good design and a commitment to quality manufacturing processes, Moventi’s portfolio boasts a comprehensive range of high performance solutions.

Moventi products are predominantly designed and manufactured in Britain, but as our name suggests we appreciate and embrace the flair of European design.

information.

Finishes

MFC Finishes

Most of the Moventi furniture items are available in a choice of 11 attractive MFC colours.

Contrasting panel and edge finishes can be mixed in all combinations. A surcharge of £15 retail per top applies.

Real Wood Veneer Finishes

Please contact your us for information on colours, prices and leadtimes on real wood veneer finishes.

Solid Wood Finishes

The Croyd table comes with a 40mm solid oak top. As with all natural products variations may occur.

Guarantee

Whilst Moventi strive to manufacture products to the highest standards we undertake to repair or replace any structural element which proves to be faulty, when used in normal office conditions, within 5 years of manufacture.

Quality & Environmental

BS EN ISO 9001:2008

Our commitment to quality management at all stages of design and manufacture are recognised in our BS EN ISO 9001:2008 accreditation.

BS EN ISO 14001:2004

We continue to enhance our environmental performance by maintaining our BS EN ISO 14001:2004 accreditation.

Product Conformity

All products have been designed to meet the British performance standards, as follows:

BS EN 527 - 1 : 2011	office furniture dimensions
BS EN 527 - 2 : 2002	office furniture mechanical safety requirements
BS EN 527 - 3 : 2003	office furniture stability and mechanical strength
BS 5459 - 2 : 2000	office furniture stability and strength

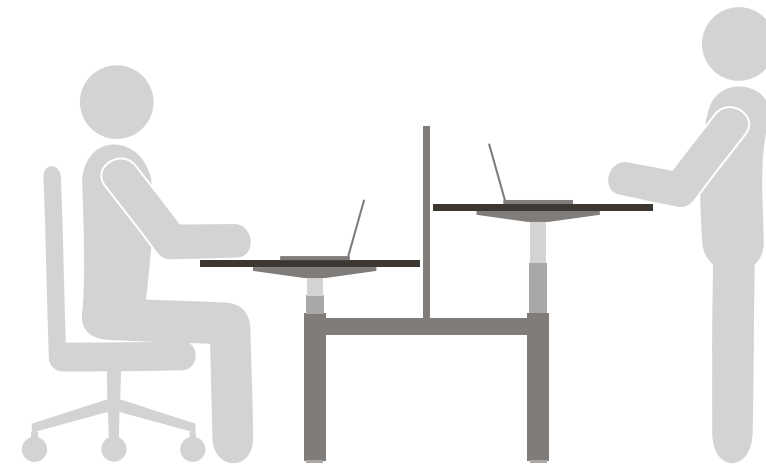

Tora Electric Height Adjustable Bench, Natural Elm/White - Cush Screens

tora

Tora is an accomplished sit-stand bench system designed to promote a healthy combination of sitting and standing during your work day. Built using high quality LINAK® actuators and a cable managed underframe, Tora is a rigid yet highly flexible system.

TR-E-3216-4, Natural Elm/White - Cush Screens

Why sit-stand?

It has been proven through research that extended periods of sitting can be damaging to your health, regardless of how much you exercise.

Researchers have suggested that diabetes, heart disease and death are all risks of sitting for long periods.

In 2011 one of the largest pieces of research on sedentary behaviour (sitting or lying down whilst awake) to date was carried out. It was found that, compared with those who sat the least, people who sat longest had a:

- 112% increase in risk of diabetes
- 147% increase in cardiovascular events
- 90% increase in death caused by cardiovascular events
- 49% increase in death from any cause

It was concluded that increased sedentary behaviour was directly linked with increased risk of all health outcomes in the criteria studied.

Giving workers the choice to stand up for periods during the work day includes the following health benefits:-

Increased Energy

It is suggested that frequent movement raises energy levels.

Burns Extra Calories

Studies show that a standing burns approximately 0.7 of a calorie more per minute.

Muscle Toning

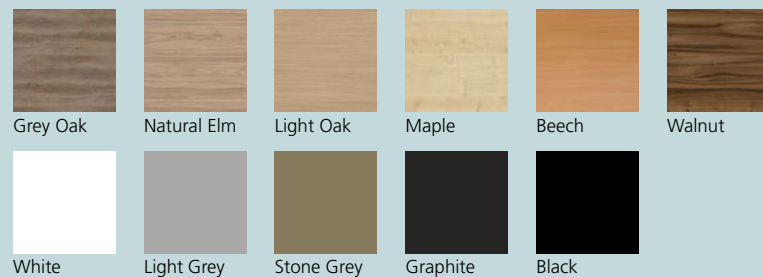

Standing requires the use of different muscles to sitting.

Increased Blood Flow

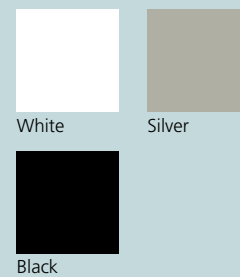

Movement increases the flow of blood and oxygen around the body resulting in increased alertness.

Radius Corners

50mm radius corner tops add a softer dimension and lessen the untidy look of many desktops at different heights.

PIEZO™ Anti-Collision Technology

The built-in PIEZO sensor feels for any obstruction when raising or lowering the desk, then halts and reverses to avoid collision.

Please note: Moventi do not recommend that more than 1 in 4 tops on a bench layout be fitted with either height adjustable packs due to stability issues.

Height Adjustable Insert Packs

Lina's height adjustable insert packs give the option to retro fit a height settable or height adjustable module into the framework of a standard bench desk.

These packs are available in 2 types:-

Height Settable Insert Pack - adjustable between 740 and 915mm, in 25mm increments

Crank Height Adjustable Insert Pack - adjustable between 740 and 1005mm

Crescent Workstations

- 25mm MFC tops
- Right hand desk shown

Code	Description	Price	Width	Depth	Height
LNCR-1412-R	Standalone crescent workstation, right hand	£656	1400	1200	740

* Qi compatible devices only

Qi Technology

Qi (pronounced "chee") is the global standard and proven leader for wireless charging.

Qi is the only wireless power solution fully integrated into smartphones without the need for cases or replaceable battery covers. You simply place a Qi-enabled device on a Qi charging surface such as Aircharge and it charges the device, simply and efficiently, no cords needed.

The Qi technology is being embraced by hundreds of leading companies meaning more and more Qi-enabled devices are being introduced.
