

welcome.

We started by studying people in the workplace – how they work, where they work, how they collaborate and how new working practices are developing. This study formed the foundation of a range of furniture that is not only inspiring but provides practical solutions for everyday activities in the workplace.

With a craving for good design and a commitment to quality manufacturing processes, Moventi’s portfolio boasts a comprehensive range of high performance solutions.

Products are predominantly designed and manufactured in Britain, but we appreciate and embrace the flair of European design.

information.

Fabric Types

Polyester

Polyester is a man-made synthetic that dates back to the 1950s. It's made from oil and although typically less expensive than wool it is prone to quickly becoming dirty and stained.

Wool

A natural and renewable material, wool has been around for millions of years and will still be here long after polyester synthetics have gone. Aside from it's environmental and sustainable qualities it's also the best performance fibre there is. It's microscopic armour like coating preserves it's beautiful appearance and it's also fire safe due to it's high moisture and nitrogen content.

So which should I use?

The less expensive nature of polyester is often attractive but it's lifespan is limited. Typically it's only recommended for use on task and meeting seating as it's lack of flex and give causes it to pucker and pull on soft seating.

Wool, on the other hand, performs equally as well on both task/meeting seating and soft seating. With it's far longer lifespan and so many inherent natural qualities, wool is always going to be the most attractive option.

See page 007 for a list of fabrics available on our seating products.

Guarantee

Whilst Moventi strive to manufacture products to the highest standards we undertake to repair or replace any structural element which proves to be faulty, when used in normal office conditions, within 5 years of manufacture.

Quality & Environmental

BS EN ISO 9001:2008

Our commitment to quality management at all stages of design and manufacture are recognised in our BS EN ISO 9001:2008 accreditation.

BS EN ISO 14001:2004

We continue to enhance our environmental performance by maintaining our BS EN ISO 14001:2004 accreditation.

Product Conformity

Our seating products have been designed to meet a number of different British performance standards. Please contact us for more details.

Two Tone Fabric

For two tone fabric (different fabrics for seat and back) use the price for the highest fabric group selected and, if applicable, add the two tone fabric upcharge per item.

Alternative Fabric Suppliers

Moventi are able to source fabrics from other suppliers in addition to those listed above. Please contact us for prices and details on availability and compatibility.

Customer's Own Material

Customer's own material is usable subject to approval by Moventi. Please contact us for further details.
