

WiFi Site Survey

Enabling Seamless Connectivity

We'll complete an analysis of your existing coverage (if any), and a review of your vital services, software and apps to ensure they run without any issues, designing your network from the ground up with this in mind.

Our provider is the market leader providing world class digital transformation and migration solutions since 1998.

Our WiFi site surveys help you design better networks, find fault with the current one or help you optimise your current infrastructure to ensure it is fit for purpose and can accommodate future scalability requirements.

Our service helps clients build an optimised workspace, it is essential to the planning and design phase, prior to the installation of a wireless network. We take the guesswork out of installing your network infrastructure.

Service Overview

- Understanding Business Needs
- Importing & Reviewing your Building Plans
- On-site pre-deployment survey
- Site set-up and test
- In depth report with recommendations
- Optional service - equipment installation

The Services We Provide:

- **Health check/ fault-finding survey**
The health check or fault-finding WiFi survey is conducted on sites where a wireless network has already been installed (whether by us, or by anyone else). Environmental Monitoring
- **Predictive Model WiFi survey**
The predictive model WiFi survey is a virtual survey, it relies upon high quality building plans to enable us to optimise the requirements.
- **On-site Design WiFi survey**
Our engineer will visit your site to conduct an AP (access point) -on-a stick survey, to emulate the coverage of an actual access point.

Benefits of a WiFi Survey

- Get a bespoke network designed for your building, network design and usage.
- Guaranteed coverage to all devices on your network, congestion and interference will be removed using the audit report.
- Optimise your network resources, from cabling to network devices, ensure you maximise your IT investment and futureproof your wireless network.

All our works are guaranteed and certified.
