

VERACO[®]

HYGIENE SOLUTIONS FOR A SAFER WORLD

Quills Group are an approved supplier:

SPECIALISTS IN SURFACE HYGIENE

We develop products that make touch points more hygienic and safer to use.

- ✓ Kills bacteria and viruses (incl. MRSA, S. aureus and SARS-COV-2)
- ✓ Long term solution (1 Year)
- ✓ Save money on excessive cleaning
- ✓ No tools required - Self adhesive backing for easy installation

WHO WE WORK WITH.

Veraco is a global hygiene brand with a network of international distributors.

We supply and service numerous clients across multiple sectors including CBRE, UK GOV, NHS, Unilever, Wolves FC, Muller, Deutsche Bank as well as many other international organisations.

We are an approved CBRE and NHS supplier and our products are approved by Network Rail.

We are an approved global partner of CBRE. We work on multiple accounts servicing clients world-wide.

Most recently we have successfully delivered a nationwide roll out of our products for Deutsche Bank on behalf of CBRE.

Our products have been approved and certified by Network Rail and are now an official fitment for Network Rail tools.

As part of the NHS Infection Prevention Control department and their AMR policy we are continuing to supply our full range of products to the NHS and their foundation trusts.

We've been working with COS to better protect their staff and customers.

Doors and handles are a breeding ground for bacteria.

We are proud to announce our partnership with Crisis, the national charity for people who are homeless or at risk of becoming homeless and who and campaign for the changes needed to solve it altogether.

We were approached by Wolverhampton Wanderers FC to help them make their stadium safer to visit.

As a Premier League Football Club battling Coronavirus, hygiene is of upmost importance.

Our products were installed across the training ground facilities, hospitality areas, player zones and key stadium touchpoints.

THE VERACO® SAFE RANGE

Surface Hygiene Solutions

- THE SAFE PAD™
- THE SAFE WRAP™

PRODUCT TESTIMONIAL FOR VERACO ANTIMICROBIAL PADS.

Calibre Control International has been a supplier of validation instrumentation to the food industry for over 35 years, providing testing technology to ensure quality and safety.

<https://www.calibrecontrol.com>

Calibre Control International is a trusted name in the industries we serve and the instrumentation we supply, amongst which is our hygiene validation offering. Our instrumentation is in use at some of the largest food processors, hospitality groups and health facilities both locally and globally.

We were recently sent a pack of Veraco Safe Touch Pads to validate inhouse, assessing their effectiveness in reducing the spread of micro-organisms via high touch areas.

We fitted door push pads to a single side of 2 doors and fitted door handle covers on alternate sides of 2 doors. The product was then monitored over the period of a month. The method of testing was our Pocket Swab range, run on a novaLUM-IX ATP reader (gold standard ATP).

The Veraco Push Pads and Door Handle Wraps all had similar and consistent results at all test times, these results ranged from 0 to 10 RLU on all, at any point during the trial. The non-padded/wrapped surfaces all had significantly higher results even directly after cleaning. A notable trend was these non-safe Padded surfaces becoming compound contaminated the further they were from their last clean.

Unwrapped door handles had an RLU range of between 300 and 300 000, these results were dependant on their location and when they were last cleaned and sanitised. Our s/steel push plates on the swing doors without Veraco Safe Pads ranged between 100 to 200 000 RLU, these results were again, dependent on their location and last cleaning/sanitising.

We have now fitted the range to the corresponding sides of the doors and can confidently recommend the Veraco Range.
